RE: Consent Order No. EPD-HW-1214

Dear Mr. Weber:

We have received the signed consent order and check for \$1,200.00 from Coil Coaters Of America. Enclosed is a copy of the executed order. The company will be expected to meet all the conditions of this order.

Your cooperation in this matter is appreciated.

Sincerely,

A handwritten signature in dark ink, appearing to read "Harold F. Reheis", written over a horizontal line.

STATE OF GEORGIA**

RE: Coil Coaters of America  
2030 Riverview Drive Ind. Drive  
Mableton, Georgia 30058  
GAD981021314

ORDER NO. HW 1214

**CONSENT ORDER**

**WHEREAS**, Coil Coaters of America (hereinafter the "Respondent") operates a facility that manufactures fabricates and finishes steel and aluminum parts at 2030 Riverview Industrial Drive, Mableton, Georgia (hereinafter the "Facility") which notified as a large quantity generator of hazardous waste on August 18, 1980, and is subject to the provisions of the Georgia Hazardous Waste Management Act, O.C.G.A. Section 12-8-60, et. seq., as amended, (hereinafter the "Act"), and Georgia's Rules for Hazardous Waste Management, Chapter 391-3-11 (hereinafter the "Rules"); and

**WHEREAS**, the Rules have adopted by reference those Regulations cited in Title 40 of the Code of Federal Regulations (hereinafter the "40 CFR") Parts 260 through 270 and Part 279; and

**WHEREAS**, a representative of the Environmental Protection Division (hereinafter the "EPD") conducted an inspection (hereinafter the "Inspection") of the Respondent's Facility on June 27, 1995, to determine the compliance status with the Act and Rules; and

**WHEREAS**, the Inspection revealed that the Respondent is a generator of a spent coating material that exhibits the toxicity characteristics for chromium (D007) and corrosivity (D002), chemical chrome conversion coating waste water treatment sludge which is classified as a listed hazardous waste (F019), and painting and degreasing waste which is classified as a listed hazardous waste (F003/F005/D001); and

**WHEREAS**, the Inspection revealed that the Respondent had operated in violation of the following rules:

40 CFR Section 262.11(b) "Hazardous Waste Determination", because the Respondent failed to classify the sludge that is generated from treatment of the chemical conversion coating on aluminum waste water as EPA hazardous waste #F019 instead of #D002/D007 in accordance with the requirements of this Section.

40 CFR Section 262.34(a)(1) "Accumulation Time", because the Respondent failed to conduct weekly inspections of the hazardous waste container storage area in accordance with the requirements of this Section, and as required by 40 CFR Section 265.174 "Inspections".

40 CFR Section 262.34(a)(2) "Accumulation Time", because the Respondent failed to place the beginning accumulation dates on 50 of the 80 drums of hazardous waste F003/F005/D001 that were stored in the hazardous waste container storage area in accordance with the requirements of this Section.

40 CFR Section 262.34(a)(3) "Accumulation Time", because the Respondent failed to mark the words "Hazardous Waste" on 50 of 80 drums of hazardous waste F003/F005/D001 that were stored in the hazardous waste container storage area in accordance with the requirements of this Section.

40 CFR Section 262.34(b) "Accumulation Time", because the Respondent failed to recycle and/or dispose of 50 drums of hazardous waste F003/F005/D001 that were stored in the hazardous waste container storage area within the 90 days allowed for a generator of hazardous waste, and therefore was operating a hazardous waste storage facility which is subject to the requirements of 40 CFR Parts 264, 265 and 270.

40 CFR Section 268.7(a)(1)(i) "Waste Analysis and Recordkeeping", because the Respondent failed to provide the appropriate listed hazardous waste code of F019 for the chemical conversion coating on aluminum sludge on the land disposal restriction notifications in accordance with the requirements of this Section.

**WHEREAS**, an amicable disposition of these allegations concerning factual circumstances reflected in this Consent Order is considered to be in the best interests of the citizens of the State of Georgia.

**NOW, THEREFORE**, before taking of any testimony and without adjudicating the merits of the parties' positions in this matter, the parties hereby resolve the issues in this case by agreement and upon the Order of the Director and the Consent of Coil Coaters of America as follows:

1. By November 20, 1995, the Respondent shall pay to the EPD the sum total of \$1,200.00 (One Thousand Two Hundred Dollars) for violations of the Rules.
2. The Respondent shall immediately reclassify the waste water treatment sludge generated from the chemical conversion coating process as EPA hazardous waste F019 and discontinue to reference this waste as EPA hazardous waste D002/D007.
3. The Respondent shall develop, implement and submit to the EPD by November ~~20~~<sup>30 RAB</sup>, 1995, a plan outlining procedures that will ensure that all hazardous waste determinations and the application of appropriate hazardous waste codes are made in accordance with the requirements of 40 CFR Section 262.11.
4. The Respondent shall develop, implement and submit to the EPD by November ~~20~~<sup>30 RAB</sup>, 1995, a plan outlining procedures that will ensure that all drums of hazardous wastes managed at the Facility are labeled with the words "Hazardous Waste", and marked with the beginning accumulation dates, in accordance with the requirements of 40 CFR Section 262.34.
5. The Respondent shall develop, implement and submit to the EPD by November ~~20~~<sup>RAB</sup>, 1995, a plan outlining procedures for ensuring that hazardous waste container storage areas are inspected on a weekly basis, in accordance with the requirements of 40 CFR Section 262.34.
6. The Respondent shall develop, implement and submit to the EPD by November ~~20~~<sup>30 RAB</sup>, 1995, a plan outlining procedures for ensuring that all hazardous wastes are removed from site within the 90-day allowance for storage of hazardous waste.
7. The Respondent shall develop, implement and submit to the EPD by November ~~20~~<sup>30 RAB</sup>, 1995, a plan outlining procedures for ensuring that all land disposal restriction notifications contain the appropriate EPA hazardous waste code for all hazardous waste generated at this site.
8. The Respondent shall, henceforth, at all times comply with the Acts and the Rules.

**THIS CONSENT ORDER** is executed solely for the purpose of resolving and disposing of allegations set forth in this Consent Order. Nothing herein shall constitute a finding or adjudication of a violation of any statute, rule, or regulation of the State of Georgia. By agreeing to this Consent Order, Respondent does not admit or acknowledge any violation or potential violation and admits no liability of any sort of any party whatsoever.

**BY AGREEMENT OF THE PARTIES**, this Consent Order shall be considered final and effective immediately and shall not be appealable and Coil Coaters of America does hereby waive any and all administrative and judicial hearings on the terms and conditions of same.

**IT IS SO ORDERED, CONSENTED AND AGREED**, this 19th day of

December, 1995.

Harold F. Reheis  
Director  
Environmental Protection Division

## Results

Data meeting the criteria you selected follows.

Total Pages: 11

Handler Count: 1

## Report Description

This report provides a complete listing of evaluation, violation and enforcement activities for each Handler, including all orphan records. Below the Handler ID information, the data is presented in three sections; evaluations, violations and enforcements. Comments, referred to as Notes, are provided in each respective section. Since evaluations are included regardless of whether or not violations are identified, this report also serves as a useful management tool for tracking progress made towards meeting RECAP commitments.

# RCRA Site Detail

Report run on: March 28, 2017 - 8:55 AM

Version 6.0

## User Selection Criteria

Handler EPA ID: GAD981021314

History: All records

BR Cycles: Show all

Include Notes: No

## Results

Data meeting the criteria you selected follows.

Total Pages: 22

## Report Description

The RCRA Site Detail report provides "all available details" from the handler module and summarized information from the waste activity monitoring module for one RCRA site. The report integrates National Biennial RCRA Hazardous Waste Report data with Site Identification data.

Details reported about the RCRA site include basic handler module information; the standard suite of universes; information about each source record received for the facility, including basic information, location and mailing address, source record and permit contact person (including historical records), list of NAICS codes, complete list of regulated waste activities; and summarized National Biennial RCRA Hazardous Waste Report information by reporting cycle year, including quantity totals (generated, managed, shipped, received), and top ten GM forms by quantity generated. Top ten GM form list shows reported waste description, quantities, onsite and offsite system types, and EPA and State waste codes.

Information listed for the RCRA site can be limited by latest historical information and most recent BR cycle.

Data is sorted by the most recent Received Date. If more than one record has the same Received Date, the data is sorted by Source Type (I-Implementer, N-Notification, B-Biennial Report with Subsequent Notification, R-Biennial Report, A-Part A, T-Temporary, E-Emergency).

## Report Information

Report run on: March 28, 2017 - 8:55 AM

## List of Hazardous Waste Code Descriptions

Please run the lookup table report for LU\_WASTE\_CODES for description of federal and state waste codes in this report.

## List of Handler Universe Abbreviations

Active	Active Status -- Indicates that the facility could be subject to the federal RCRA, Subtitle C or a state's authorized hazardous waste program. This definition has no legally enforceable or binding determination about the status of a particular site or the obligations of an owner or operator.
Commercial TSDF	Commercial TSDF -- Indicates that the facility is a commercial operator of treating, storing and disposing of hazardous waste.
EI Indicator (HE/GW)	Environmental Indicator (Human Exposure/Groundwater Release) -- Indicates that the facility has controls in place for Environmental Indicators. HE - Human Exposures ('+' indicates the exposure exists and is under control; '-' indicates the exposure exists and is not under control; 'N' indicates the exposure does not exist). GW - Groundwater Release ('+' indicates the exposure exists and is under control; '-' indicates the exposure exists and is not under control; 'N' indicates the exposure does not exist).
Federal Generator	Federal Generator Status -- Indicates the regulatory status of the site as determined by the quantity and/or toxicity of hazardous wastes generated, stored or accumulated over a specified period of time.
HSM	HSM -- 1st character - Indicates that the facility manages hazardous secondary material(s) (e.g. spent material, by-product or sludge) that when discarded, would be identified as hazardous waste. 2nd character - Indicates that the product of the facility's recycling process has levels of hazardous constituents that are not comparable to or unable to be compared to a legitimate product or intermediate but the recycling is still legitimate.
IC In Place	Institutional Controls in Place -- Indicates that the facility has Institutional Controls in place ('Y' indicates that the facility is in the universe).
Importer	Importer -- Indicates that the facility imports hazardous waste into the United States from a foreign country.
Mixed Waste Generator	Mixed Waste Generator -- Indicates that the facility is a generator or TSDF that handles waste mixed with nuclear source, special nuclear or by-product material.
Operating TSDF	Operating TSDF -- Indicates that the facility is a Treatment, Storage or Disposal facility subject to any type of enforcement. It then specifies the type of facility (L - Land Disposal; I - Incinerator; B - BIF; S - Storage; T - Treatment).
Short Term Generator	Short Term Generator -- Indicates that the facility is a short term or one time event generator and not generating from ongoing processes.
State Generator	State Generator Status -- Indicates the regulatory status of the site in view of implementing the State's "broader in scope" or "more stringent than" rules. Although an implementing State might use terms that differ for their generators these terms would be translated to match the Federal regulatory term.
Transporter	Transporter -- Indicates that the facility is engaged in the off-site transportation of hazardous waste. ('Y' indicates that the facility is in this universe).
Subpart K/College	Subpart K/College or University -- Indicates facility has opted into the subpart k laboratory rule as a college or university.
Subpart K/Hospital	Subpart K/Teaching Hospital -- Indicates facility has opted into the subpart k laboratory rule as a teaching hospital.
Subpart K/Non-profit	Subpart K/Non-profit Research Institute -- Indicates facility has opted into the subpart k laboratory rule as a non-profit research institute.
Subpart K/Withdrawal	Subpart K/Withdrawal from Rule -- Indicates facility has withdrawn from the subpart k laboratory rule.
